

Thursday 7th January - Home Learning

Reception - Miss Stone

Good Morning Reception, I hope you all had a fantastic day yesterday and enjoyed doing lots of learning. It was lovely to hear from so many of you through email, it looks like you have been very busy! The children that have been in school did the yoga yesterday and it was lots of fun. This morning, you could have a go at doing activate, I know how much you all enjoy this too [Activate at Home - Module 5a1 - Weeks 1 & 2 morning activities. - YouTube](#) or there is another yoga if you want to do that [We're Going on a Bear Hunt | A Cosmic Kids Yoga Adventure! - YouTube](#).

Please remember, if you need any help at all you can email me, and I will help in any way I can. I will look forward to hearing from you all, keep smiling!

Phonics

In phonics today, I would like you to practice all the phonemes we have covered so far in Phase 2. You could think of a word which starts with each sound with your parents. I have been practicing 'b' and thought of the words 'ball, bat and bug'. Can you think of any more words? I also would like you to look at your tricky words we have learnt (to, the, no, go, I and into) - can you write some of them?

Then with parents, you could find some objects in your house. See if you can find a peg, tin, tap, bin and a cup. Once you have found those things in your house, you could practice writing those words with your family (Remember to sound those words out using your fingers - how many sounds are in each word?) - can you work together to write a sentence and then read it back - I have written the sentence - The tin is in the bin.

If you want an extra challenge you could do a rainbow letter on paper (the children can choose any letter they would like to. Remember to do it in lots of different colours). Then, on the back draw as many things as you can think of which start with that sound.

Activities

Here are some activities you have a go at:

- Reading a book - if you have a phonics book you could read that. If not, this is the link to the Oxford Owl website - if you create a free account

you can access lots of the books we use in school and also some of the children's favourites such as Winnie the Witch. [Free eBook library | Oxford Owl from Oxford University Press](#)

- Make the number cards from 0-10, cut them up and then put them in the correct order (for an extra challenge to blow me away, you could do the numbers 0-20).
- Measure something - you could use a tape measure, your hands, a ruler or a cup. I am going to get a banana and see if it is bigger or smaller than my hand.
- Talk to your family about which day of the week it is (can you remember our days of the week song?). What is the weather like today? What month are we in?

I have been reading lots today, I would like you to read a book with your family every day too. Today I read one of our favourites, The Gruffalo. Can you remember who the author of this story is? What does the author do? You could tell your parents what the author does, I bet they will be very impressed!

I am very proud of everyone trying very hard with their work, you are all amazing! Keep in touch with me as I love to see all your work.

Take care,

Miss Stone
